Rev. 1.02

1

Introduction

Miradisplay is a powerful WiFi display receiver product, it is a special device to project your mobile phone/MID/Notebook to another big screen through WiFi connection, under the popular standards like DLNA, Miracast and Airplay. It doesn't only support Miracast for Android/Windows, but also support AirPlay for iOS devices. For more information or setup video, please find the detail on our website: www.miradisplay.com.

Hardware:

1. AirPlay/Miracast button: Switch AirPlay or Miracast Mode on the

fly

AirPlay Mirror:

Make sure your device is booted and stayed in AirPlay/DLNA mode

1. Open WiFi setting, find Miradisplay-xxxxxxx and connect with it

2. Swipe up and find AirPlay
